

Creation of a greenhouse complex for growing vegetables using high-tech equipment to meet the needs of the market during the off-season

Information

Description, project history:

Introduction of greenhouse vegetable growing technology using low volume hydroponic technology.
The project was funded in 2012

Location: Aktobe region, Aktobe, Blagorodny rural district

Production: tomatoes, cucumbers, grown in protected ground

Current status of the project: problematic, temporarily not functioning

Project cost: 1 696 553 417 tenge (*the project cost is approximate, subject to changes depending on various factors*)

The mechanism of realization of the project to a potential investor: greenhouse - buy and sell agreement, equipment-secondary leasing

Support tools: installment payment

Brief description of the project: the Project is being implemented 15 km from the city of Aktobe, , Blagorodny rural district.

Use of modern technologies. Possibility of production of fruit and vegetable products during the periods of seasonal absence of fruit and vegetable products cultivated on the open ground (from November to may). Low cost of natural gas in the region. The greenhouse complex is divided into two parts of 1.5 hectares each, where one part is equipped with an artificial lighting system (additional lighting), the rest of the greenhouse is not equipped with a system of additional lighting

Target market: Aktobe, Aktobe region, cities and regions of the Republic of Kazakhstan.

The capacity of the project: only 1,515 tons (cucumbers-823.68 tons, tomatoes-681.2 tons), with 1 sq. m. cucumbers 55 kg. and tomatoes 50 kg

Infrastructure: all infrastructure on the investment site (electricity, gas, water, road network, including international traffic)

Reason of project problem: the lack of additional lighting in the second part of the greenhouse does not allow you to reach full design capacity, poor quality management, management problems, insufficient working capital

Cessation of activity: 2019
